Kod QR:

The Dynamic Experience CD series offers a truly dynamic sense of scale and reality to the music.

This is the most 'dynamic' series of CD's STS Digital has ever produced with the help of the unique STS Digital MW Coding Process.

Volume 1 offers 10 super tracks from the likes of Grace Jones, Stevie Ray Vaughn and Yello.

This CD shows just how wide a range of dynamics the CD medium can achieve and how this offers a sense of scale and reality to the music. Who said the CD was dead?!

Dynamic bass output, so one warning: This CD is not very suitable to play VERY LOUD on small bookshelf loudspeakers, you may damage them - but great fun loud on larger loudspeakers!

Tracklisting:
